John D. Rockefeller pays four per cent of the income tax. That means that when John D. pays \$4 the rest of us, numbering 109,999,999 pay \$96. Dividing this up between all of us, each of our shares does not amount to much. While it seems a little strong for Rockefeller to pay such a large proportion, most any of us will trade places and make a contract to pay that 4 per cent the rest of our lives.

Scott's Emulsion is helping thousands every day who could not find other relief. Refuse the alcoholic substitutes.
